

# Take the 30-Day Challenge

Device as a Service is a way to equip employees with the right technology and productivity tools they need, while offering analytics and support that lower your overall costs. Imagine shifting IT from a cost center, to a profit center. We'll show you how in 30 days.

## Improve Employee Productivity

Reduce total deployment time by 4 months

**68%** of employees aren't currently satisfied with their technology experience

**61%** improvement in end-user productivity, following implementation of desktop deployment and management services

## Decrease IT Workload

Analytics that predict issues before they occur

**77%** of IT leaders spend too much time on 'keeping the lights on'.<sup>1</sup>

**47%** of IT professionals spend more than 4 hours a day addressing alerts, for example malware detection, phishing attempts, or failed logins.<sup>2</sup>

## Strengthen Security

Reduce the risk of endpoint breaches and improves license compliance

**64%** experienced one or more successful endpoint attack over 12 months

**102** average days to patch endpoint

**\$440** average cost per compromised endpoint

## Optimize IT Spend

**67%** lower costs for software

Organizations that adopted 'as a service' models spent less<sup>3</sup>

**59%** lower costs for services

Equips end users with appropriate devices and maintains an appropriately-sized device inventory

Pay only for what you use with one price per device, inclusive of the lifecycle support and services needed

Reduces accidental damage costs for devices

Anyone can do anything for 30 days. What could our 30-day DaaS challenge do for you?
