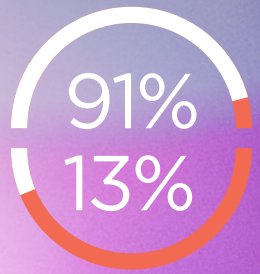
AI PCs built for business

Users want you to step it up

The AI era has us all asking more of users. This has caused employees to speed up their adoption of AI faster than their organizations can keep up.



91% of employees surveyed say they use generative AI at work, and only 13% said that the companies they work for have fully implemented AI.[1]

Keeping these high-performing employees engaged is becoming increasingly difficult, but also increasingly important. Organizations with more engaged employees have seen 23% higher profits than their competitors, driven by less absenteeism, turnover, shrinkage, safety incidents, and errors — combined with higher productivity and customer loyalty.[2]

The goal is to increase engagement with high-performing users and meet their AI needs before users have to act on their own.

80% of AI users bring their own tools to work.[3]

Currently, 80% of AI users bring their own tools to work, creating security issues and missing opportunities to take advantage of centralized, scalable, cutting-edge AI tools for teams.[3] Organizations are discovering that if they want the best performance from their users, they have to equip their users to be their best.

AI PCs built for business

Lenovo

Smarter AI brings out the best in your users

Smarter organizations want to get the most powerful devices in the hands of their most productive users. AI PCs provide your users a more personalized, productive, and protected experience.

Personalized

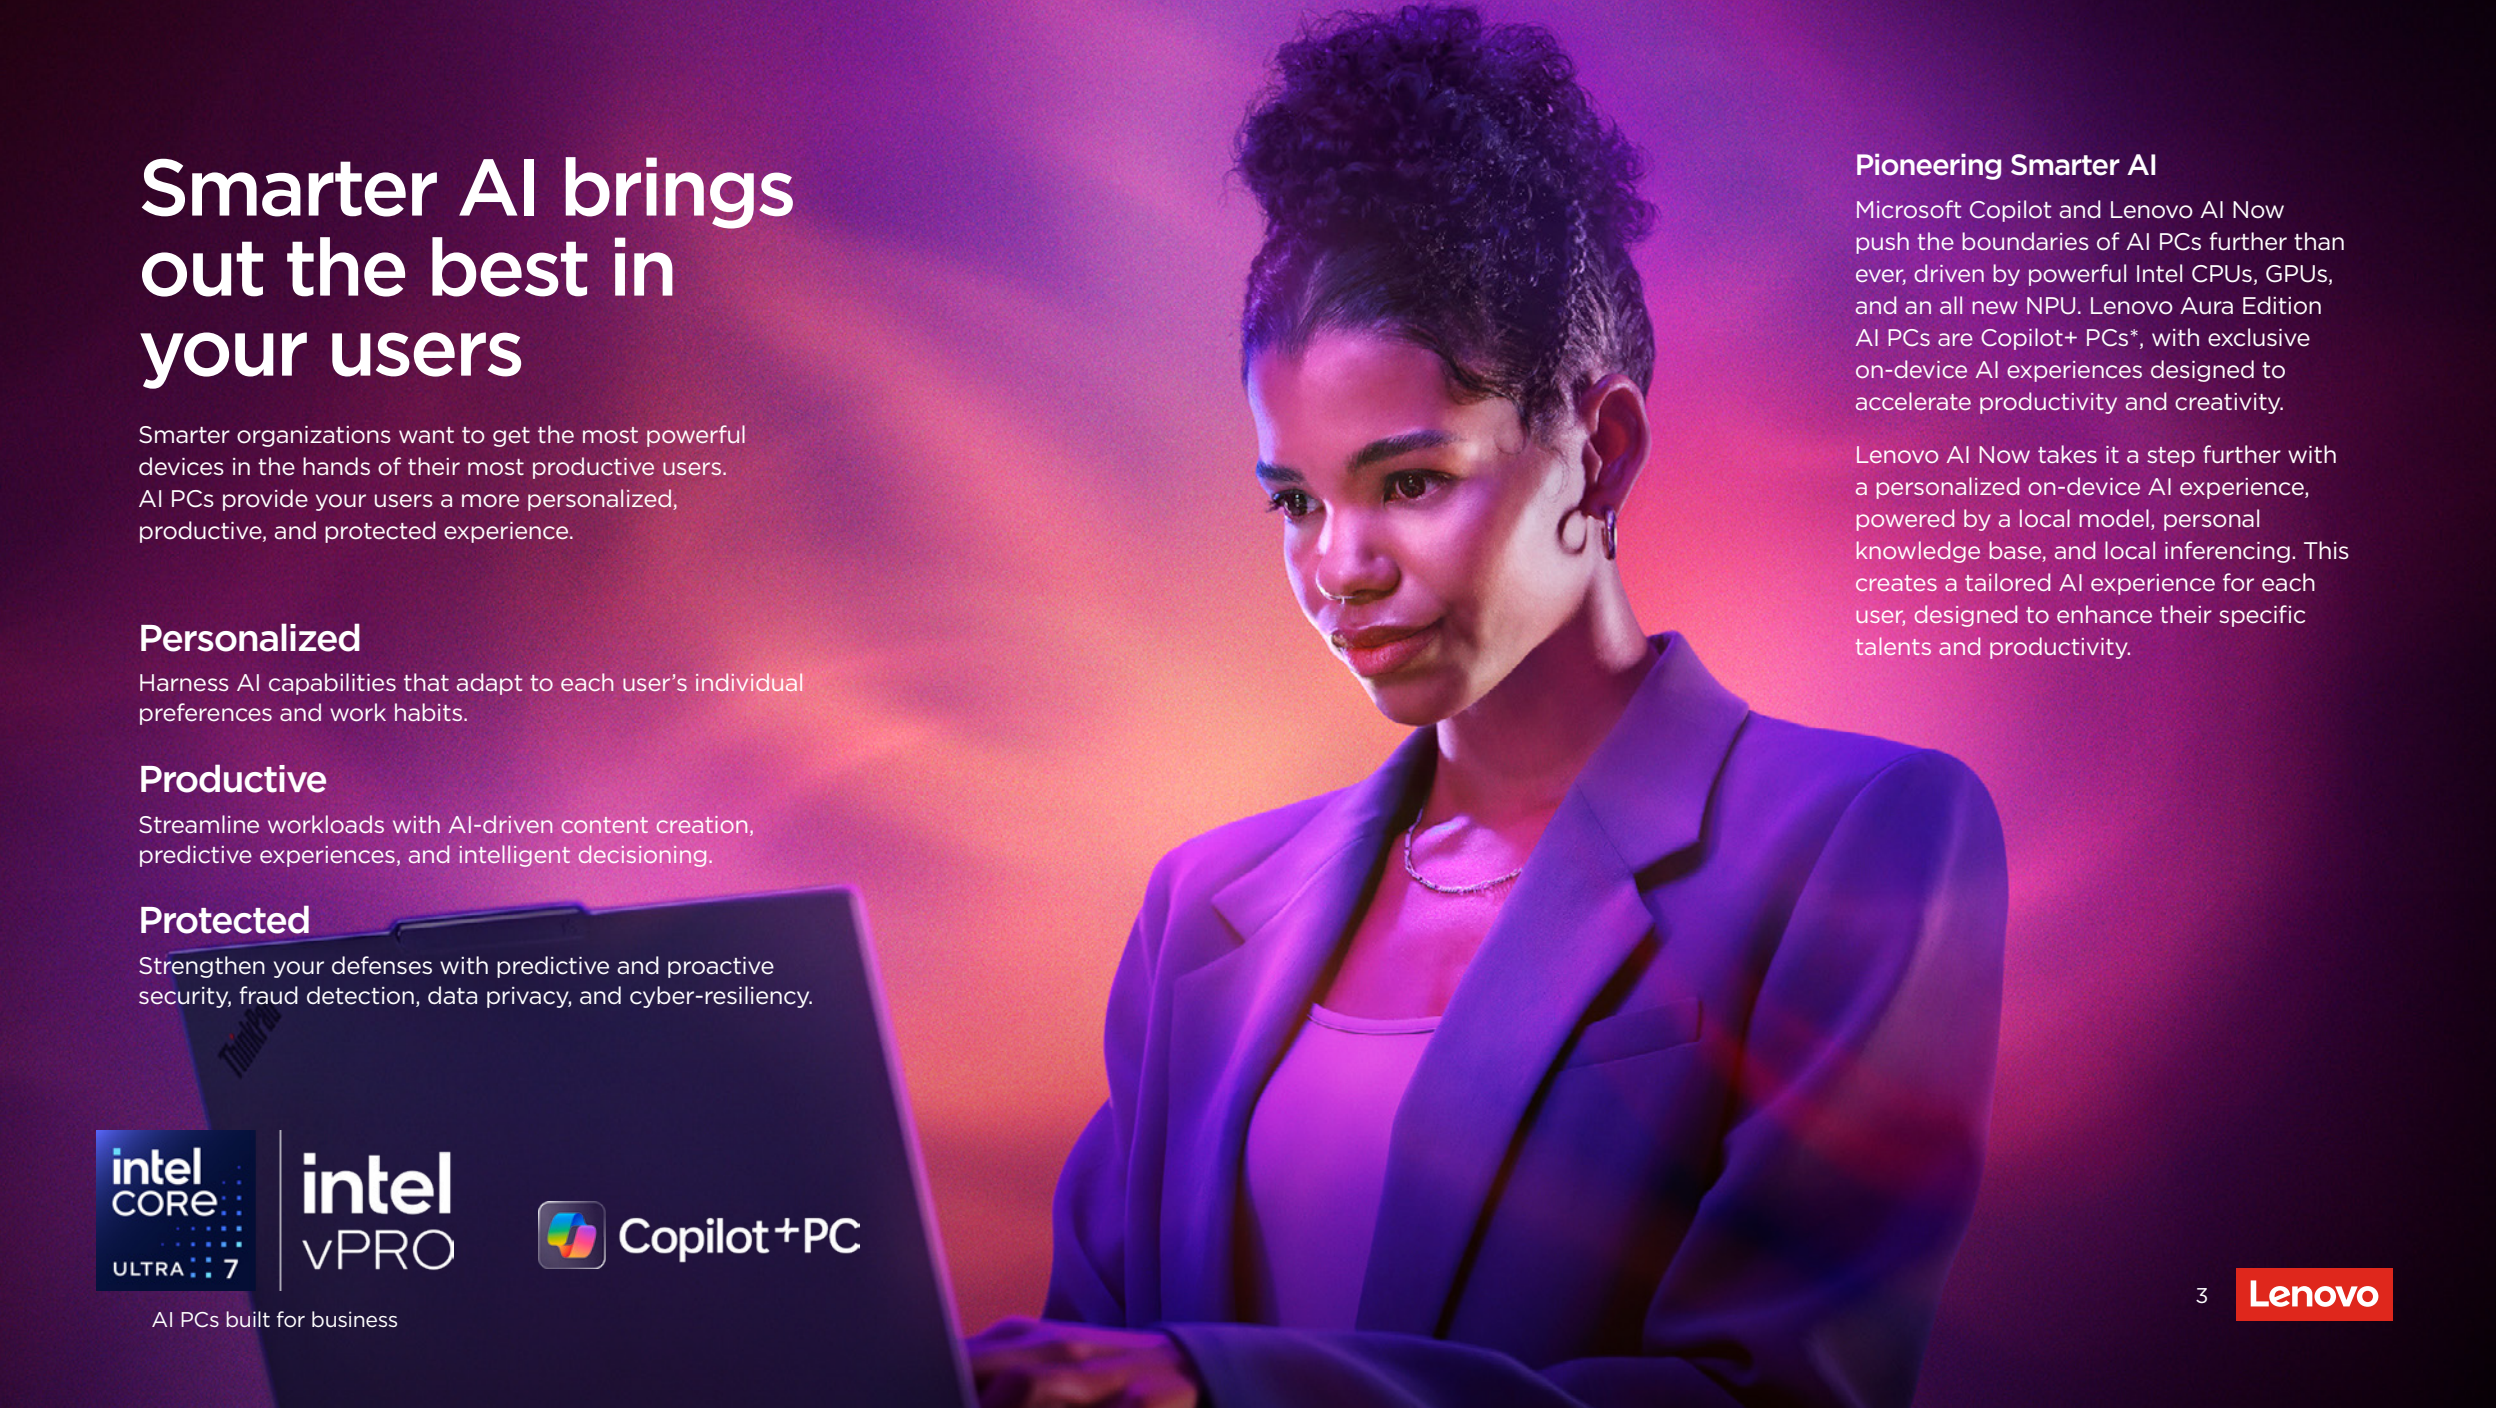
Harness AI capabilities that adapt to each user's individual preferences and work habits.

Productive

Streamline workloads with AI-driven content creation, predictive experiences, and intelligent decisioning.

Protected

Strengthen your defenses with predictive and proactive security, fraud detection, data privacy, and cyber-resiliency.



Pioneering Smarter AI

Microsoft Copilot and Lenovo AI Now push the boundaries of AI PCs further than ever, driven by powerful Intel CPUs, GPUs, and an all new NPU. Lenovo Aura Edition AI PCs are Copilot+ PCs*, with exclusive on-device AI experiences designed to accelerate productivity and creativity.

Lenovo AI Now takes it a step further with a personalized on-device AI experience, powered by a local model, personal knowledge base, and local inferencing. This creates a tailored AI experience for each user, designed to enhance their specific talents and productivity.

AI PCs built for business

Smart Modes

Activate modes for different scenarios to automate common tasks, group settings, and increase employee productivity.

- **Shield:** Enhance online security and privacy through auto prompt VPN, privacy alert, and privacy guard features.
- **Collaboration:** Improve the virtual meeting experience and ensure engaging video communication through video effect features.
- **Attention:** Minimize distractions by blocking access to pre-set domains and notification.
- **Power:** Reduce power consumption and improve battery performance by changing the battery setting.
- **Wellness:** Promote digital health by encouraging regular eye breaks and fostering better ergonomic habits.

Smart Care

Get real-time troubleshooting from real-life technicians and personalized self-help resources.**

- **Device diagnostics:** Use the device's diagnostics to make more accurate recommendations.
- **Real-time visibility:** Check on the status of your device and service request.
- **Instant support:** Get instant support from your desk using your PC — through chat, phone call, or video call.

Smart Share

Developed by Lenovo and powered by Intel® Unison™. Simply tap your phone to your PC to share.

- Users can easily send photos between their favorite devices.
- Get an instant connection from simply tapping your phone to your PC to launch the app.

Lenovo ThinkPad® X9 14 Aura Edition

The Lenovo ThinkPad® X9 14 Aura Edition, imagined with Intel, is the premium pick-up-and-go AI PC your users will love.

Premium experience

The ultra-thin (13mm) aluminum design looks and feels as luxurious as it runs, with the latest Intel® Core™ Ultra processors providing premium AI experiences, seamlessly running Copilot+ PC features well into the future.

Portable productivity

Collaboration gets a huge upgrade for users with this ThinkPad's 90.9% screen-to-body ratio and up to high-resolution 8MP (4K) camera. Work from anywhere with all-day battery life and massive amounts of power — without the heft. This ThinkPad starts at just 1.24kg!

Thoughtful materials

From the 100% recycled cobalt cell battery to the 50% recycled aluminum covers and recyclable packaging, this ThinkPad was made to meet your sustainability goals. Tactile markings on the keyboard also make this a more accessible device for visually impaired users.

Copilot+PC

AI PCs built for business

A reimagined ThinkPad® experience

The Lenovo ThinkPad® X9 Aura Edition Series, imagined with Intel, redefines the ThinkPad® experience with next-gen AI capabilities, best-in-class battery life, and the innovations from Microsoft Copilot and Lenovo AI Now — all in a sleek, quiet, and cool design.

Lenovo

Lenovo ThinkPad® X9 15 Aura Edition

Go bigger and bolder for the ultimate AI experience with the Lenovo ThinkPad® X9 15 Aura Edition, imagined with Intel.

Smarter performance

Experience premium AI from the latest Intel® Core™ Ultra processors with integrated Intel® Arc™ graphics and Intel® AI Boost Neural Processing Unit (NPU). Unlock the most from AI-enhanced productivity, while retaining all-day battery life.

Elevated user experiences

The premium 15.3-inch OLED display with a 91% screen-to-body ratio adapts to the user's environment and pairs perfectly with the industry-leading high-resolution 8MP (4K) camera with IR and two noise-cancelling microphones. The giant haptic Touchpad (135mm x 80mm) and expansive new keyboard design ensure navigation disappears into the background and productivity increases.

Revolutionary design

This bolder, cutting-edge ThinkPad® is engineered for getting things done in style. Ultra-portable and streamlined at 13.37mm thin and 1.4kg in weight, this is the perfect representation of a new generation of ThinkPad, thoughtfully refined in every way for on-the-go sophistication. Your users will look as polished as their creations — wherever work takes them.

AI PCs built for business

Get the most from your X9

Enhance your Lenovo ThinkPad® X9 Aura Edition Series, imagined with Intel, and make the most of your new AI capabilities.

1 Lenovo TWS Earbuds (X9 Edition)

Designed for seamless integration with the ThinkPad X9, these earbuds offer auto-answering, smooth device switching, and clear call quality. With hybrid active noise cancellation and voiceprint technology, they provide an exceptional audio experience.

2 Lenovo Multi-Device Wireless Mouse (X9 Edition)

This compact, ambidextrous mouse delivers comfort and productivity with a customizable quick-access AI Now button for seamless interaction with the ThinkPad X9. It connects to up to three devices via USB-C receiver and Bluetooth® with Swift Pair, and offers USB-C fast charging or wireless Qi charging.

3 Lenovo X9 Charging GaN Dock

This all-in-one dock is a sleek, portable solution for the ThinkPad X9 users, combining power and connectivity with an integrated 65W GaN power module, 4K@60Hz display support, three USB ports, and a card reader.

4 Lenovo Origami 14" and 15.3" X9 Sleeve

Protect your ThinkPad X9 in style with the dual-functional 14" and 15.3" sleeves. The origami-fold design doubles as a stand for improved ergonomic viewing, while non-slip textured surfaces provide better grip and targeted padding ensures enhanced protection.

AI PCs built for business

Lenovo

Unlock your productivity superpowers with Smart Care

The Lenovo ThinkPad® X9 Aura Edition Series devices enable users to troubleshoot in real time with Lenovo support thanks to exclusive Smart Care capabilities, on their PCs and the Smart Care mobile app.

- Virtual assistant, support callback, and eTicket submission
- Support history tracking
- Knowledge base for self-management
- Multi-device management under one Lenovo ID on mobile version (and PC with Lenovo Vantage)

Step up to Premier Support Plus to reduce downtime

Lenovo's Premier Support Plus, this year's winner of the Gold Stevie® Award for Best Technical Support Solution, reduces downtime even further.[4] Keep users connected, engaged, and productive wherever they are with executive-grade support — 24 hours a day, 7 days a week.

- Proactive and predictive alerts
- Prioritized repair and support
- Live agents available through chat, phone, and remote camera sharing
- Accidental Damage Protection, Sealed Battery Warranty Extension, and Keep Your Drive services***
- Technical account managers for escalation management
- Single point of contact for case management

AI PCs built for business

Lenovo

Protected from threats at every level

Lenovo ThinkShield and Intel vPro® safeguard Lenovo Aura Edition devices with fully customizable hardware, software, and services solutions — securing your organization from threats below the operating system all the way to the cloud.

Secure Wipe 2.0

Delete sensitive data on a drive without using external tools, or removing the drive and running log reports to confirm the SSD or HDD has been wiped.

Preventative threat detection

AI-powered security capabilities help detect threats before they happen, including ransomware, cryptojacking, and software supply chain attacks.

Supply chain assurance

Enhance transparency of the supply chain and stay protected against any emerging threats.

Privacy protections

Access better privacy protection tools and more secure firmware that protects and detects. Benefit from tamper-evident packaging for all shipments and secure disposal, which protects deleted data without the need for external tools.

Non-soldered SSDs

Remove before servicing to secure data and keep it under IT control.

Modern remote management tools

Remote management is built into the hardware, providing telemetry and device insights that feed AI Ops.

Firmware Resiliency 2.0

Expand self-healing capabilities beyond the core BIOS. Provide autonomous, non-bypassable, and immutable attestation functionality that becomes the additional hardware root of trust measure and verifies the signatures of multiple parts of the platform hardware, firmware, and configuration.

Intelligent PC diagnostics

Use a simple smartphone app to track more precise servicing results.

Human presence detection

Screen lock detects when the user leaves and automatically locks the system.
