

MANUFACTURING TECHNOLOGY WORKSHOP

Get Expert Support for Your Team

Let us help you look for ways to leverage enabling technology to plan your strategic roadmap, optimize your business, or simply tackle a single continuous improvement initiative. Our manufacturing technology workshop lets our experts delve into your facility and processes to learn more about the current state of operations and IT, and better understand your business. We will identify and prioritize enabling technologies and provide high-level recommendations for your current and future technology strategy.

How It Works

During the workshop, we will work with you to identify key process areas (such as production, warehouse, or shipping). We will discuss existing pain points and line of business strategic objectives in order to build a technology maturity and prioritization matrix.

4 Steps to a Stronger Partnership

1. Briefing: First, we go through a virtual briefing to review objectives, deliverables, and logistics associated with your strategic initiatives. We will also define bounding for engagement and deliverables. The level of comprehensiveness will be dependent upon our access to line of business process owners and tours of the process areas covered.

2. On-Site Visit: Next, our team conducts an in-person, on-site, full-day session to engage with senior leaders to better understand your business goals, determine key process pain points, and review any existing strategy planning objectives. Our experts will tour your engineering, inventory and warehousing, production, and repair/service facilities to better understand the physical environments, infrastructures, and processes associated with your value stream.

3. Strategic Reports: Following the on-site visit, we will review the information we collected. This will include benchmarking, technology alignment, and enablement of business strategy, as well as creation of a high-level strategic overview and roadmap recommendations. These assets will be delivered in advance of the virtual out brief.

4. Out Brief: To conclude, we will provide a virtual out brief to review key takeaways and observations from the on-site visit, as well as suggested resources, products, and services that we can provide.

Throughout the workshop, your dedicated Account Executive will be accompanied by a knowledgeable support team, including the Manufacturing Director, Dedicated Field Representative, and Solutions Architect.
