LOGITECH SIGHT

Help remote employees get the best perspective in every hybrid meeting with Logitech Sight. This AI-powered tabletop camera works hand in hand with Logitech Rally Bar or Rally Bar Mini to capture, identify, and present virtual attendees with the best sound and view of the meeting room action.

TABLETOP CAMERA WITH INTELLIGENT MULTI-PARTICIPANT FRAMING

Sight is a tabletop companion camera that works in tandem with Logitech Rally Bar or Rally Bar Mini to provide a front-and-center view of meeting participants around the table. With seamless integration with all major video conferencing platforms, Sight enhances your hybrid meeting experience by capturing audio and video deeper into the room, making remote attendees feel more included and engaged.

Whether you're hosting a large-scale conference or a small team meeting, Sight ensures that every participant can contribute and be heard with equal clarity. With Sight, you can take your hybrid meetings to the next level and create a more engaging and effective meeting experience for all attendees.

A FRONT-AND-CENTER VIEW FOR EVERY MEETING

An equitable companion for Rally Bar or Rally Bar Mini

Sight combines with Rally Bar or Rally Bar Mini to provide a responsive front-and-center view of everyone in the room. It intelligently frames active speakers, delivering clear audio and face-to-face video to remote participants.

See and hear clearly into larger rooms

With a pickup range of 2.3 m or 7.5 ft, Sight is designed for medium-to-large rooms, intelligently detecting and capturing conversation and nonverbals clearly, all around the table.

Track conversations naturally

Adaptive intelligence identifies, frames, and follows up to four speakers at a time, while switching between active speakers as the conversation shifts.

WORKS WITH LEADING VIDEO PLATFORMS

Leverage the video conferencing platforms and features you already use. Sight integrates with leading video platforms like *Microsoft Teams*, *Zoom*, and *Google Meet** to make hybrid meetings more equitable and inclusive.

*See www.logitech.com/prosupport/sight-compatibility for more details

CRYSTAL CLEAR AUDIO AND VIDEO

- 1 **315° video capture:** Presents participants around the table with dual lenses that capture up to 4K resolution.
- 2 **Directional mic pickup:** Detects active speakers using direction of arrival of voices. Seven beamforming mics replace the need for a mic pod.
- 3 **Mic mute controls:** With the touch of a button, users can quickly and easily mute or unmute the microphones in the room.
- 4 **Indicator lights:** The three colored LEDs clearly indicate video on/off, mute on/off, in-call status, power status, and more.
- 5 **Magnetic privacy shade:** Slide the magnetic shade in front of the lenses to automatically turn off video capture.
- 6 **Included mounts for a secure install:** Secure Sight and route cables across the table using the table mount. Use the grommet hole mount to hide cables down under the table. Place Sight in non-traditional rooms with U- or V-shaped tables by securing it to a tripod stand.
