Knox Capture

# Fast, flexible and cost-effective barcode scanning

Samsung Knox Capture transforms the camera on a Samsung smartphone or tablet into a powerful, enterprise-grade barcode scanner.

Powered by industry-leading scanning software for fast, accurate and reliable scanning

Combined scanner and smartphone or tablet gives your team a lightweight, easy-to-use solution with fewer devices to buy and maintain

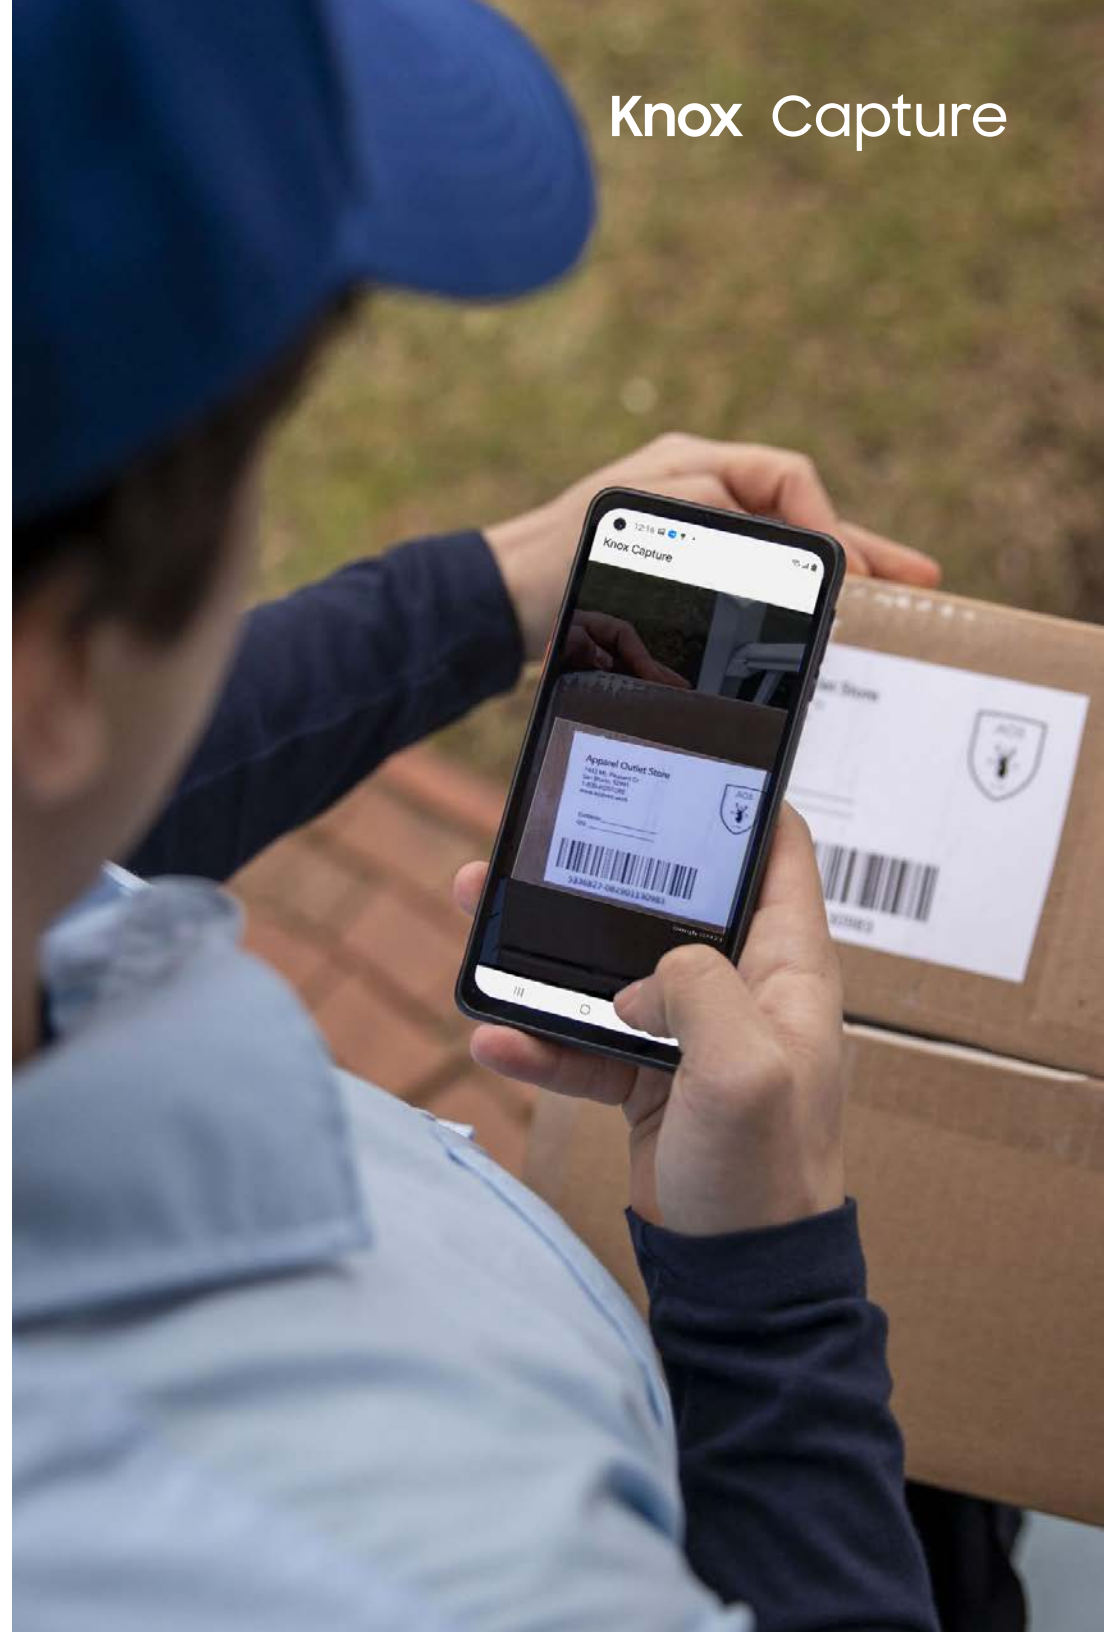

Enterprise-grade scanning on multipurpose device adds functionality and versatility for digitized business workflows

Deploy quickly with a ready-to-use, off-the-shelf solution that doesn't require coding or integration

Conduct tasks and control inventory with the latest technology using Augmented Reality (AR)<sup>1</sup>

## Enterprise-grade scanning

Unlock higher productivity with Knox Capture, a fast and accurate camera-based scanner that empowers frontline workers.

- Supports up to 27 of the industry's most used 1D & 2D symbologies (barcode types)
- Scan damaged or blurry codes and perform in low-light environments
- Capture multiple barcodes (up to 10) in one scan

## All-in-one solution

Go beyond simple barcode scanning with Knox Capture.

- Replace bulky, traditional, purpose-built scanning devices with lightweight, multipurpose, versatile tablets and smartphones
- Scan, email, collaborate, make calls and send texts, all on one device
- Scan into enterprise applications that ordinarily wouldn't have scanning capabilities, like Microsoft Teams & Office, Salesforce and more
- Consolidate devices to reduce total cost of ownership

## Simple and seamless use

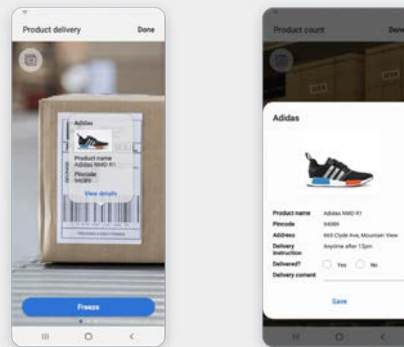

Configure Knox Capture for ultimate productivity.

- Activate the scanner app with a push of a button using the programmable button on Samsung Galaxy phones or Samsung keyboards
- Scan barcodes in the same way smartphones take pictures
- Reduce end-user training needs with a platform your employees already know

## Augmented Reality

Add an advanced layer to Knox Capture using AR technology that enables workers to conduct tasks and control inventory with the latest technology.

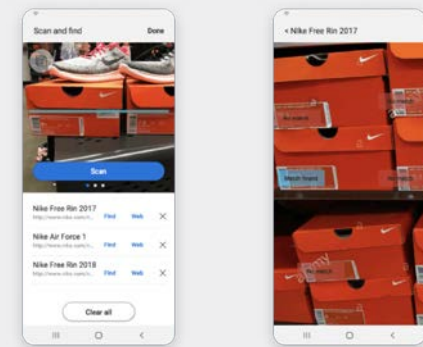

### AR read & write View / make real-time changes with AR

Hover over barcodes to see product details

Update information right from the AR view

### AR search & find Find the right product faster

Scan and save items an associate needs to find

Hover over stock to find the item that matches the barcodes

## Ready for business

Customize your hardware to fit your business needs.

- Extend barcode scanning capabilities with Bluetooth (HID) / USB scanning accessories like SKX Pro SmartSled and Pistol Grip from trusted Samsung partner KOAMTAC
- Employees can easily switch between the device camera or hardware accessory

Pistol Grip for SKX SmartSled\*

\*Accessories are sold separately.

SKX Pro 2D Imager SmartSled\*

# Knox Capture

## Digitize paper and manual workflows

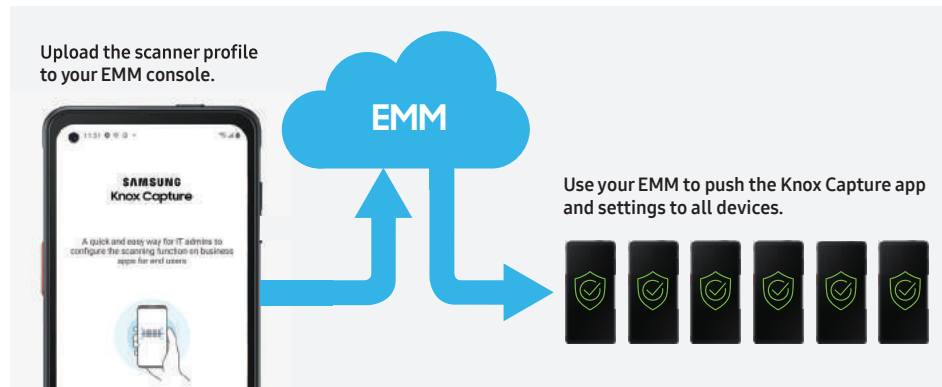

**Stop relying on hand-keyed data entry.** Scan data directly into the apps that employees use regularly. This includes web apps, native apps, progressive web apps and most terminal emulation apps.

Easily tackle almost everything with advanced data formatting, so you can send keystrokes, enter keys, prefixes and suffixes and append or truncate data into your business apps in real time.

## Deploy to your team in minutes

Knox Capture is an off-the-shelf application for Samsung mobile phones and tablets running Android 12 and above.

The Knox Capture application is available in the Android store and is supported on all major device management platforms. The application and scanning configurations can be deployed over the air using your preferred UEM to quickly outfit a large, geographically dispersed team at the click of a button.

## Low code and high code customizations available

Knox Capture offers granular control to tailor scanning settings for each application. It is available for moderate to heavy customization with Android Intent Output or SDK<sup>1</sup>, or if you want to save time and development costs and cut down on labor-intensive coding, you can use Data Wedge to start scanning right away.
