

Transform the way you engage

Technology is transforming the healthcare industry. You need a portfolio of devices that can keep up.

Healthcare has been on the leading edge of a transformative time. But the requirement for devices that offer the flexibility to meet with patients at the bedside, communicate with colleagues across distances, and securely access sensitive information, apps and services remains constant.

Microsoft Surface for Business offers a versatile portfolio of devices to support healthcare professionals delivering care and improve the patient experience.

Light, mobile, and powerful, Surface provides the perfect suite of devices and the best of Microsoft to support multiple roles and work styles, keep private information secure, and deliver better outcomes for patients.

“Our clinicians love that [the Surface Go is] small, portable and quick to boot up. Information at the nurse's fingertips means we're capturing that time resource and putting it back into our patients. Being able to provide the best care is really, really fulfilling.”

Sophie O’Kane
Electronic Patient Records Lead, Royal Hospital for Neuro Disability

Built for the way you work

Surface devices are intuitive to use, powerful, efficient, and incredibly secure. And because they were designed for the software you trust, they offer a range of benefits for IT:

The best devices for the intelligent workplace

Allow people to do their best work from anywhere, with modern devices that let them connect, collaborate and communicate in new ways.

Leading modern management

Give users freedom but maintain control with Microsoft Endpoint Manager* and DFCL for complete and seamless device management.

Enterprise-grade security

Surface devices are equipped with TPM version 2.0, and feature Windows Hello biometric password-free sign-in.

Physicians

Challenges

- Managing teams
- Coordinating with specialists
- Consulting remotely with patients
- Securely storing patient information

Better engagement

- Surface Pro devices offer a versatile, high-performance 2-in-1 that adapts to the ways you work
- Engage with patients right at the bedside, or rely on LTE¹ for anywhere connectivity for remote consultation
- Enterprise-grade security and management

Nurses

Challenges

- Providing personalized care and support
- Staying productive on the move
- Updating patient records accurately and securely

Better care

- A full Windows 10 experience in the palm of your hand with Surface Go 2
- Run critical EHR and productivity apps
- Stay productive the entire shift with extended battery life²
- Surface devices are [safe to clean with approved disinfectant wipes](#)

Mobile Care Workers

Challenges

- Connecting with specialists and doctors remotely
- Capturing and storing patient information securely
- Staying connected from anywhere

Better delivery

- Surface Go 2 offers an ultra-lightweight device for fully mobile telemedicine
- LTE connectivity¹ with data encryption brings security on the go
- Capture e-signatures on the spot with Surface Pen*

Pharmaceutical Reps

Challenges

- Keeping up-to-date on drugs and treatments
- Staying connected on the go
- Sharing convincing content with doctors

Better fulfillment

- Surface Pro X with LTE Advanced¹, our thinnest 2-in-1, adapts to the ways you work
- The latest 10th Gen Intel® Core™ processor ensures efficient and productive customer engagements
- Stunning PixelSense touchscreen and Surface Slim Pen* make it easy to finalize agreements
