Windows 11

Windows 11 Pro was designed for hybrid work

Flexible Cloud Management

Secure, deploy, and manage all users, apps, and devices with Microsoft Endpoint Manager powered by Windows 11. This simple, cost-effective platform is built to help your organization move forward in the cloud journey without disrupting existing processes.

- **Cloud security across endpoints**
  Protect user devices against threats with Microsoft Zero Trust technology.
- **Maximum return on investment**
  Leverage existing investments to modernize the user experience with Microsoft 365 telemetry.
- **Comprehensive management**
  Simplify automated provisioning, configuration management, and software updates for all endpoints.

Universal Print

Reduce IT time and effort spent on printing support with Windows 11. Universal Print is a cloud-based print solution that enables simple, rich, and secure experiences for the end user, with very little need for IT intervention.

- **Effortless printing**
  Allow your users to print from anywhere when connected to the internet and authenticated to Azure AD.
- **Document and data protection**
  Protect organizational and personal data through secure connections and adherence to Microsoft data management guidelines.
- **Streamlined print management**
  Manage printers through a centralized portal and eliminate the need for on-premises print infrastructure.

Cloud Configuration

Windows 11 offers simple device configuration options designed for hybrid work. Using these Microsoft-recommended configurations, Windows 11 devices become easily managed endpoints enhanced for security and productivity.

- **Simplified management**
  Manage apps, users, and security all in one place with Microsoft Endpoint Manager.
- **Optimized for productivity**
  Access the innovative apps and tools your end users need to be successful.
- **Built-in security**
  Protect workers, data, and company assets with powerful, integrated security features.

99% Compatibility

Windows 11 Pro was designed for hybrid work

Allow your users to securely stream their entire Windows experience from the cloud to any device with a Windows 365 Cloud PC. All their personal apps, content, and settings will be included, eliminating productivity disruptions. If you do encounter any issues with app compatibility, Microsoft will help resolve them at no additional cost.

Work Smarter with Lenovo and Windows 11
Deploy faster and manage your entire workforce with ease.

Lenovo PCs equipped with Windows 11 are reliable, secure, and powerful for users while also being easy for IT teams to deploy and manage from the cloud. Choose from the latest ThinkPad and ThinkBook laptops to offer your workforce an incredible user experience, no matter where they're working.

Lenovo ThinkBook 15 Gen 4 IAP

The ThinkBook 15 Gen 4 IAP helps hybrid users excel with expandable storage and memory, spectacular visuals, and business-grade security that ensures their data never gets into the wrong hands.

Lenovo ThinkPad X1 Carbon Gen 10

Ultra-thin and ultra-light, the ThinkPad X1 Carbon Gen 10 is designed to move with the user while still offering optimal security through enhanced integrated ThinkShield features.
