

MANUFACTURING IN A BOX

Turnkey IT Solutions Designed for Your Business

Using Connection's modern Manufacturing in a Box solutioning ensures your equipment will be provisioned, tested, validated, and securely packaged before arriving at your site. Having this one source vendor ensures all your products arrive on time and ready for the day of implementation. This allows you to have limited downtime and reduces the amount of hands-on work required on location.

Turn to the Experts at Our Technology Integration and Distribution Center (TIDC) for:

- Manufacturing in a Box solutions
- Mobility and endpoint delivery
- Services custom tailored to your unique industry, equipment, and users

We Understand Today's Manufacturing Challenges

- Lack of resources to support major initiatives, new facility modernization and builds, inability to meet objectives with current staffing
- Lack of skillsets or capabilities to stock, configure, validate, and deploy technology
- Lack of scale and ability to compress project schedules to meet business goals and timelines
- IT teams are understaffed and stressed

How We Can Help

- Manufacturing in a Box
- Augment stressed and overworked teams
- Compliment with new skillsets and capabilities
- Ensure scalability necessary for growth or large multisite initiatives
- Shorten project rollouts and integrate with master schedules to ensure project success
