

Vision AI for Safer Workplaces

Identify hazards real time, send multi-sensory alerts, and gather key safety indicators for improving safety management processes.

Revolutionize workplace safety with Chooch Vision AI. Our system delivers real-time visibility into unsafe acts, security risks, and hazards through automated multi-sensory alerts and comprehensive risk assessment dashboards.

By fusing computer vision with LLMs, Chooch goes beyond mere detection and prediction. We offer automated data analysis for proactive safety management, empowering EHS teams to mitigate incidents, ensure compliance, and focus on high-priority strategic tasks.

Uninterrupted, Always-on Safety Monitoring

Leverage comprehensive Vision AI that delivers real-time, continuous intelligence to ensure proactive incident prevention.

ReadyNow safety applications

Identify over 50 potential risks with ReadyNow safety models, guaranteeing no key safety details are missed.

Advanced analytics

Large Vision Models combined with LLMs provide contextual understanding and deeper incident analysis for predictive decision intelligence.

Fast and easy implementation

Deploy Vision AI within days with seamless integration to existing cameras, sensors, and network infrastructure.

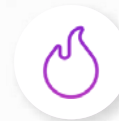

Flexible deployment options

Deploy Vision AI where it fits best—on the edge, in the cloud, or on-premise, ensuring optimal efficiency.

ReadyNow AI Applications

Integrate Vision AI seamlessly into your existing safety management workflows.

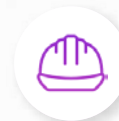

Fire & Smoke

Slips, Trips & Falls

Hard Hats
