

# Identity solutions for managing user access and authentication

Whether you are looking to manage user access, implement multifactor authentication, secure every password or do a combination of each – LastPass has a solution for you.

## Choose which one is right for your business:

	<b>LastPass Teams</b>	<b>LastPass Enterprise</b>	<b>LastPass MFA</b>	<b>LastPass Identity</b>
<b>Overview</b>	Solve <b>password management</b> challenges.  Built for organizations of 50 or less, LastPass Teams offers team-wide password sharing, an intuitive admin dashboard, unlimited sync and a variety of policies to set password requirements.	Solve <b>access</b> challenges.  LastPass Enterprise is the only all-in-one single sign-on and password manager solution, made simple and secure for SMBs to manage access across every entry point in the business.	Solve <b>authentication</b> challenges.  LastPass MFA is an adaptive authentication solution that leverages biometric and contextual factors to go beyond standard 2FA, ensuring the right users are accessing the right data at the right time, without any added complexity.	Solve <b>identity</b> challenges.  LastPass Identity provides simple control and unified visibility across every access point to your business, with an intuitive access and adaptive authentication experience that works on everything from cloud and mobile apps to legacy on-premise tools.
