

macOS Integration Evaluation

Optimize Your Infrastructure for Mac Growth

The benefits of using Apple[®] as a platform have been recognized by organizations around the globe.* Those who have not yet made the switch are considering widescale Mac[®] deployments. However, without proper planning, introducing new options into a traditional IT environment may result in an end-user experience that doesn't match expectations. Connection and Apple are here to ensure your macOS device deployments are successful.

macOS Integration Evaluation Service

Proper planning and implementation of Apple technologies and best practices is critical to successful Mac management and a positive user experience. Our macOS[®] experts will work with your IT team while leveraging Apple assessment tools and recommended best practices to enhance your Mac environment.

Who Would Benefit from this Evaluation?

- Companies who are interested in offering Mac as a choice on a wider scale
- Organizations that want to hear more about Apple best practices and management tools
- Businesses that have an existing Mac deployment, but do not have a dedicated Mac-focused device management team
- Enterprises that are moving their Mac users to a home office and want to make sure the experience is optimal

What to Expect

This evaluation is provided at no cost to your company. After reviewing your environment, Connection will deliver a customized report highlighting the strengths of your macOS[®] environment, along with any opportunities that could enhance your corporate security and/or end-user experience.
