INTRODUCTION

Managing a modern application environment can be a tricky proposition. As more organizations expand their office borders into the home, the demands for productivity enhancing software—and a data center optimized to deliver it—increase. Don't fall behind. Connection partnered with Foundry to deliver this peer-level review of the information you need to know when taking a fresh look at your application environment.

METHOD AND OBJECTIVES

Survey Goals

In this survey we evaluate:

- Challenges in supporting and managing application environments
- Visibility into application workloads
- Status with respect to application rationalization and DevOps adoption
- Perceived benefits of leveraging third-party services to help support the application environment

Total Respondents:

100

Collection Method:

Online questionnaire

Geography:

U.S.

Field Dates:

September 7-20, 2022

Number of Questions:

8

Company Size:

500 employees or more

Senior Decision-makers:

Respondents are employed in IT management roles

RESPONDENT PROFILE

41% HOLD C-LEVEL I.T. TITLES; 89% ARE DIRECTOR AND ABOVE

Job Titles

Question S3: What is your primary job title?

Base 100

SIX IN TEN (60%) ARE EMPLOYED AT COMPANIES WITH 5,000+ EMPLOYEES

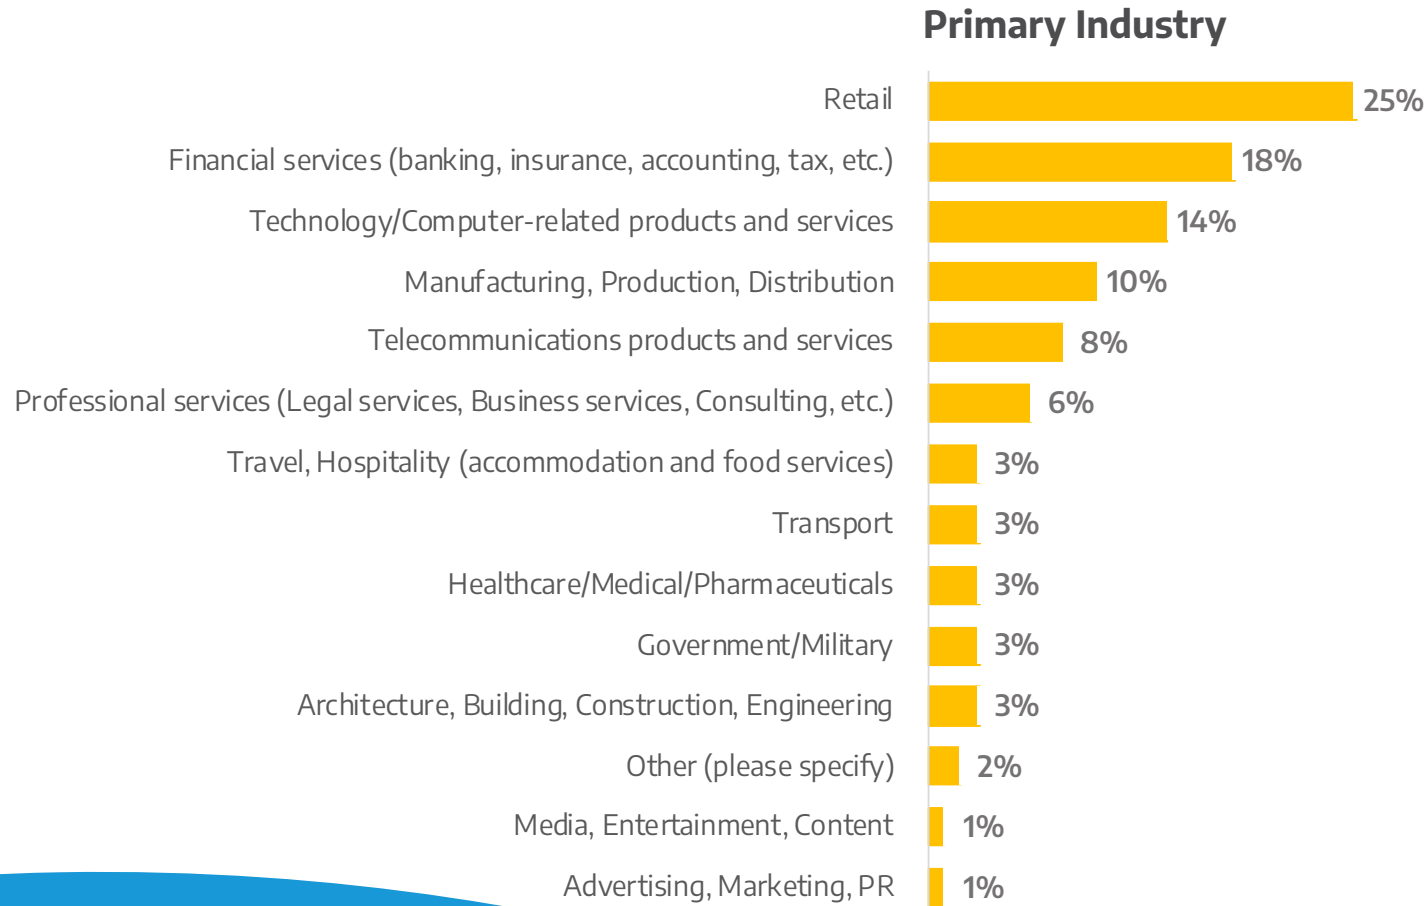

Company Size (Number of Employees)

Question S1: Approximately how many people are employed in your entire organization or enterprise?
(Please include all plants, divisions, branches, parents, and subsidiaries worldwide.)

Base 100

RETAIL, FINANCIAL SERVICES, TECHNOLOGY, AND MANUFACTURING ARE TOP VERTICALS

Question 9: Which of the following best describes your organization's industry or function?

Base 100

EXECUTIVE SUMMARY

- **More than half (53%) report applications are running in a hybrid environment today.**

One third (36%) are running applications in a private data center/private cloud, and 11% in a public cloud/multi-cloud environment.

- **Budget constraints (73%), lack of visibility (55%), legacy technology (46%), and security (46%) are top challenges in supporting application environments.**

Challenges vary by type of application environment. Those with private data centers more often struggle with budget, visibility, legacy technology, and security.

- **More than two-thirds of all respondents report it's challenging to gain adequate visibility into various types of application workloads.**

Those running applications in hybrid environments report higher levels of visibility overall into application workloads. A total of 36% of those with hybrid environments report very high visibility versus 2% of those exclusively running in private data centers.

- **More than one-third (39%) indicate their organizations have an enterprise-wide strategy for application rationalization.**

An enterprise-wide strategy is more often in place among those running applications exclusively in a private data center/private cloud.

- **Most organizations (93%) report using DevOps either across the entire application environment or in one or more areas.**

There are no significant differences by type of application environment.

- **The vast majority (90% or more) would find services such as application workload assessments—and access to development and/or DevOps resources—to be highly valuable.**

- **Increasing productivity/speed is perceived as the top benefit of leveraging third-party services to support application environments.**

Perceived advantages of third-party application support services vary by type of application environment.

SURVEY RESULTS

MORE THAN HALF (53%) REPORT APPLICATIONS ARE RUNNING IN A HYBRID ENVIRONMENT TODAY

Which of the following best describes the environment running your applications today?

Question 1: Which of the following best describes the environment running your applications today?

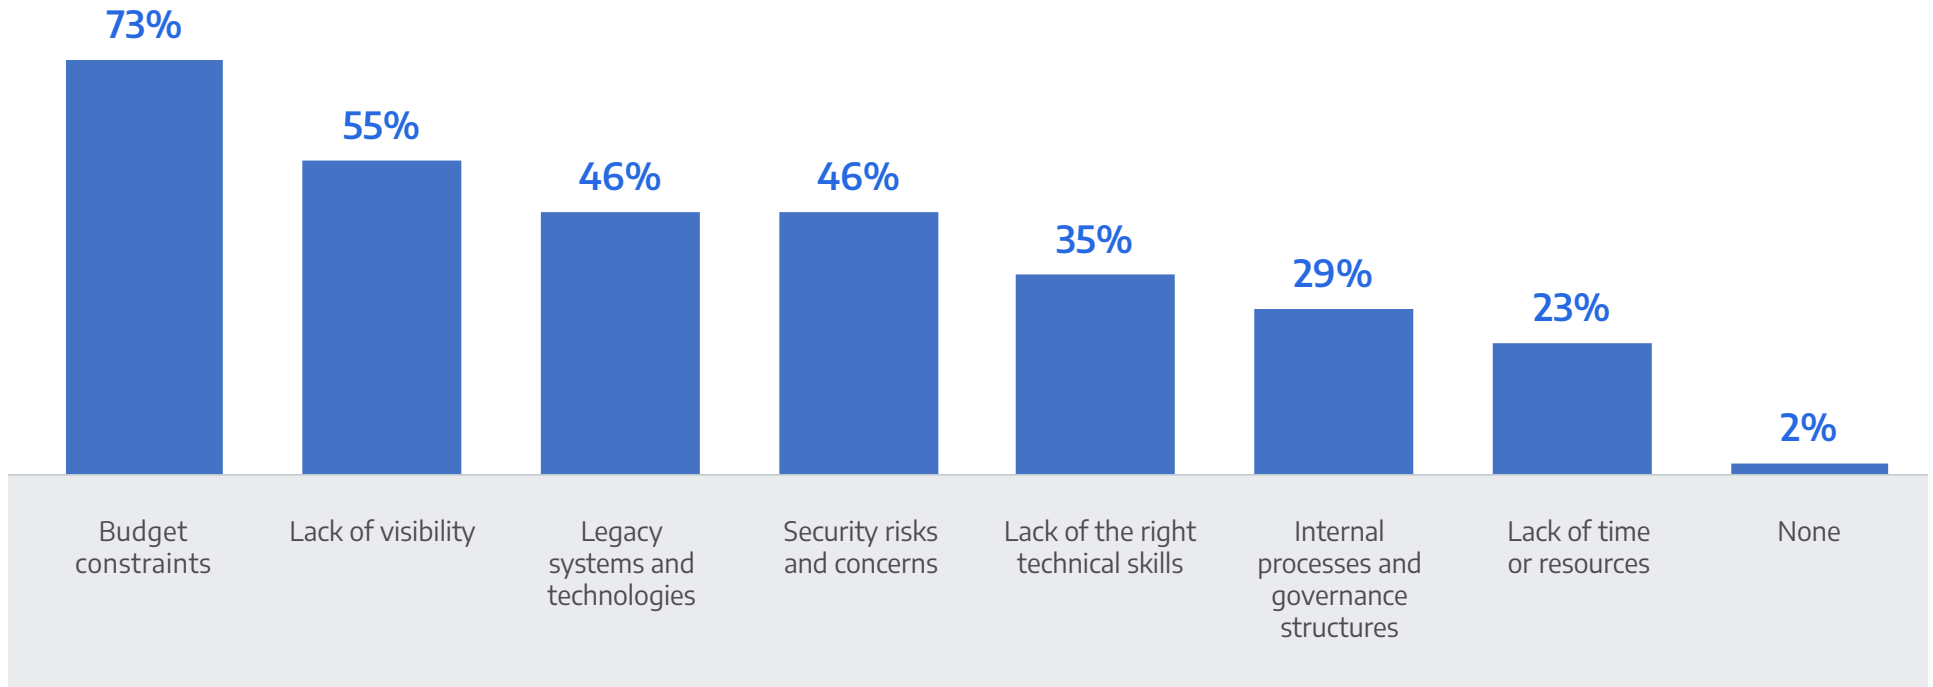

Base 100

TOP CHALLENGES IN SUPPORTING APPLICATION ENVIRONMENTS

Budget Constraints, Lack of Visibility, Legacy Technology, and Security

Challenges in supporting application environment

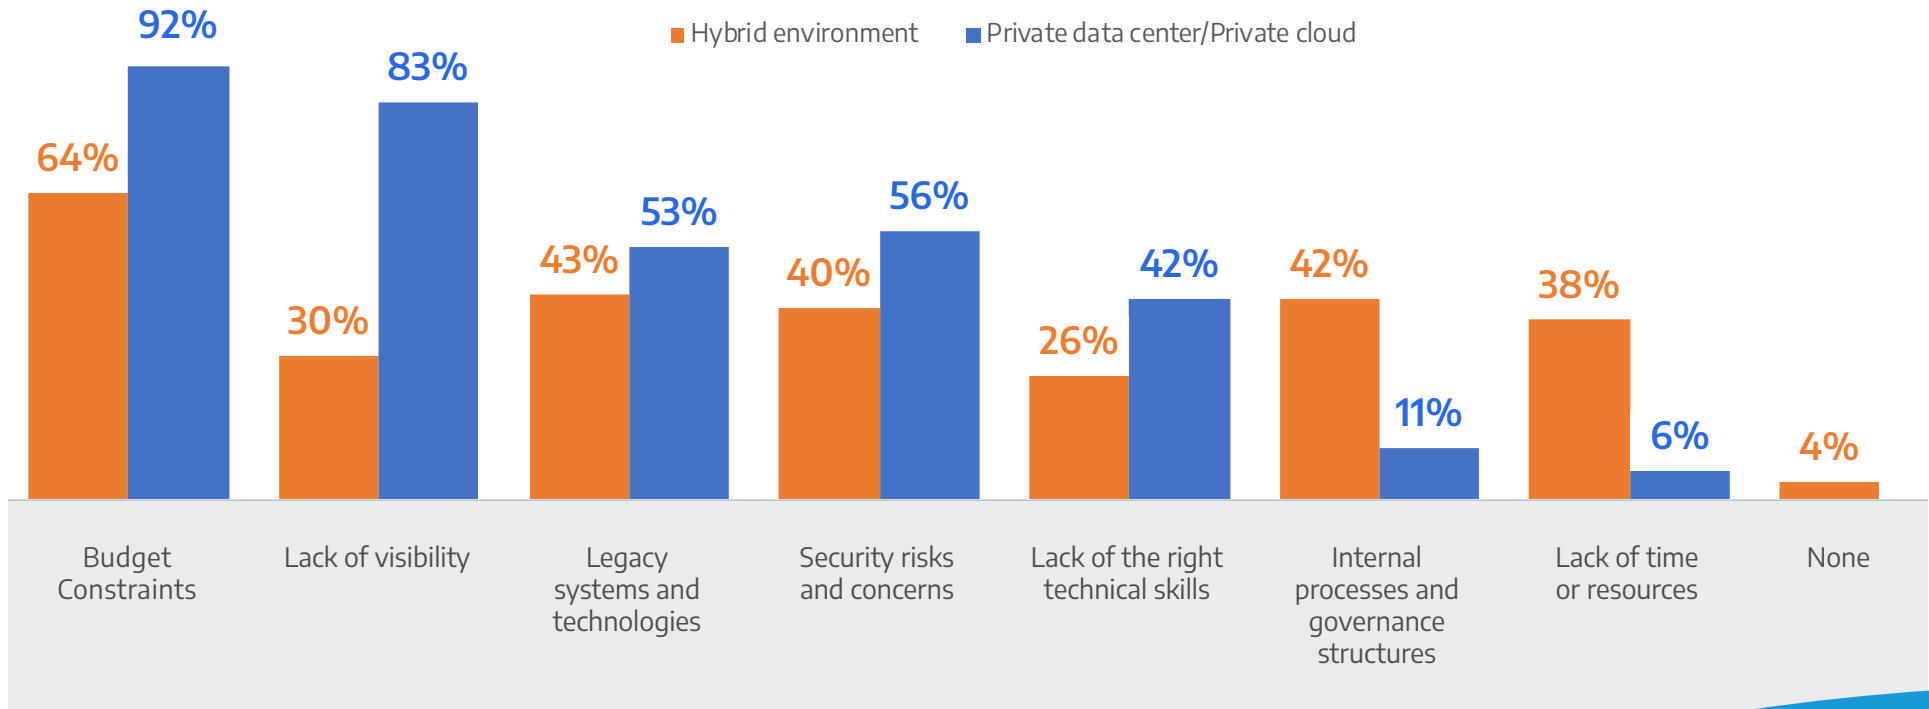

Question 2: What are your organization's challenges with respect to supporting your application environment? (Please select all that apply.)

Base 100

CHALLENGES VARY BY TYPE OF APPLICATION ENVIRONMENT

Private Data Centers More Often Struggle with Budget, Visibility, Legacy Technology, and Security

Challenges in supporting application environment

Question 2: What are your organization’s challenges with respect to supporting your application environment? (Please select all that apply.)

Base 53 with a hybrid environment; 36 with a private data center

THOSE RUNNING APPLICATIONS IN HYBRID ENVIRONMENTS REPORT HIGHER LEVELS OF VISIBILITY INTO APPLICATION WORKLOADS

Visibility into application workloads

Question 3: How would you rate your organization's overall level of visibility into your application workloads?
By "visibility", we are referring to the ability to gain insights into application performance, health, cost effectiveness, and other such aspects of an application.
Base 53 with a hybrid environment; 36 with a private data center

MORE THAN TWO-THIRDS OF ALL RESPONDENTS REPORT IT'S CHALLENGING TO GAIN ADEQUATE VISIBILITY INTO VARIOUS TYPES OF APPLICATION WORKLOADS

How challenging is it to gain adequate visibility into the following types of application workloads?

Extremely challenging Very challenging Somewhat challenging Not very challenging Not at all challenging

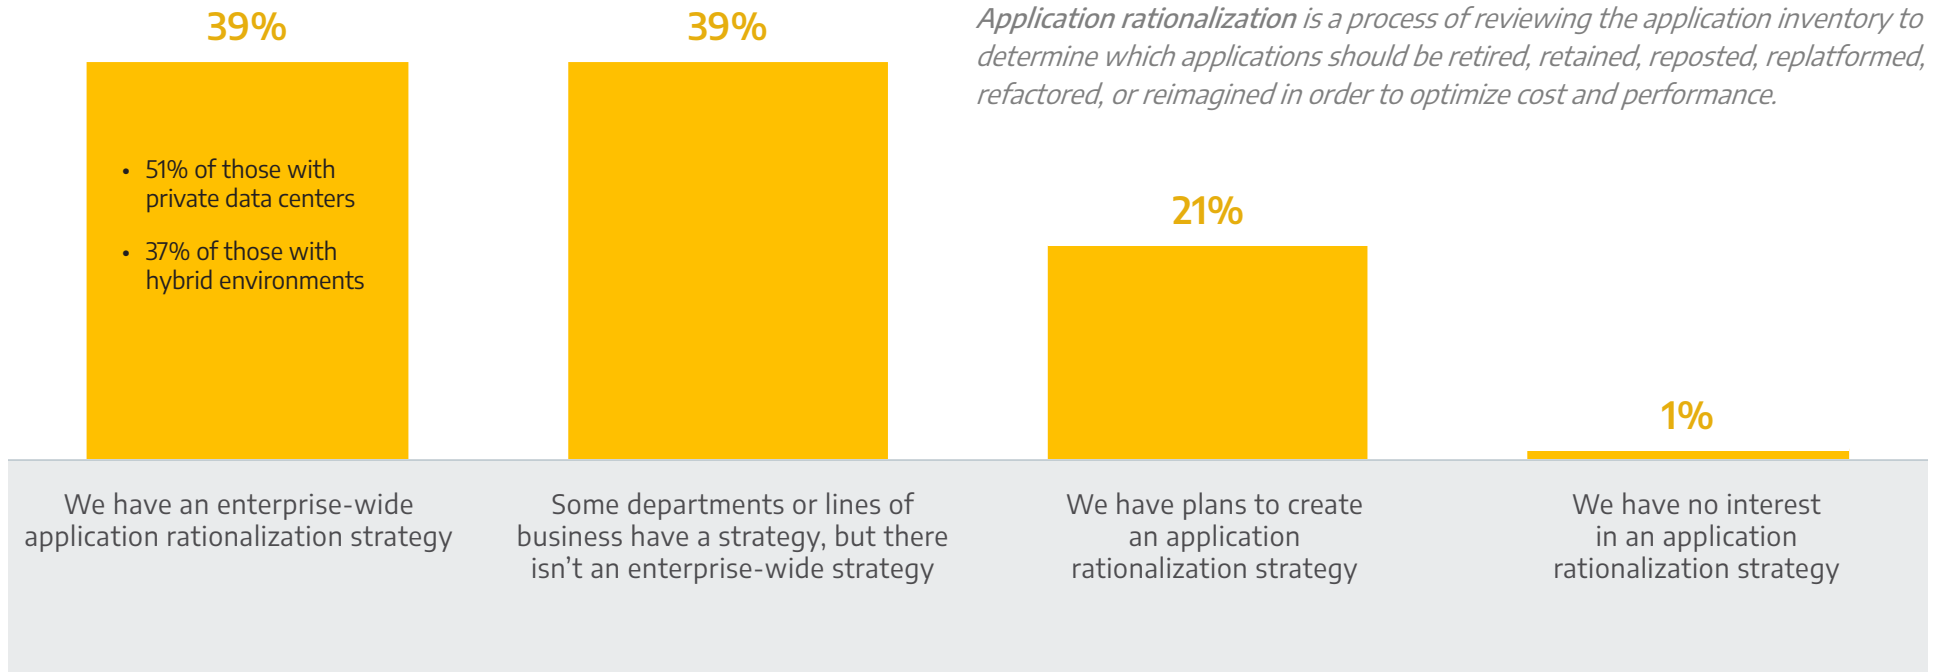

Question 4: How challenging is it to gain adequate visibility into the following types of application workloads?

Base 100

MORE THAN ONE-THIRD (39%) INDICATE THEY HAVE AN ENTERPRISE-WIDE STRATEGY FOR APPLICATION RATIONALIZATION

Status with respect to application rationalization

Application rationalization is a process of reviewing the application inventory to determine which applications should be retired, retained, reposted, replatformed, refactored, or reimaged in order to optimize cost and performance.

Question 5: Application rationalization is a process of reviewing the application inventory to determine which applications should be retired, retained, reposted, replatformed, refactored, or reimaged in order to optimize cost and performance. Which of the following best describes your organization's status with respect to a rationalization strategy?

Base 100

MOST ORGANIZATIONS (93%) REPORT USING DEVOPS EITHER ACROSS THE ENTIRE APPLICATION ENVIRONMENT OR IN ONE OR MORE AREAS

Use of DevOps

Question 6: Which of the following best describes your organization's use of DevOps?

Base 100

90% OR MORE

Find Services Such as Application Workload Assessments and Access to Development and/or DevOps Resources Highly Valuable

How valuable would the following third-party services be for your organization in helping to support your application environment?

Question 7: How valuable would the following third-party services be for your organization in helping to support your application environment?

Base 100

INCREASING PRODUCTIVITY/SPEED IS PERCEIVED AS THE TOP BENEFIT OF LEVERAGING THIRD-PARTY SERVICES TO SUPPORT APPLICATION ENVIRONMENTS

Attractive potential advantages of leveraging third-party services to help support an application environment.

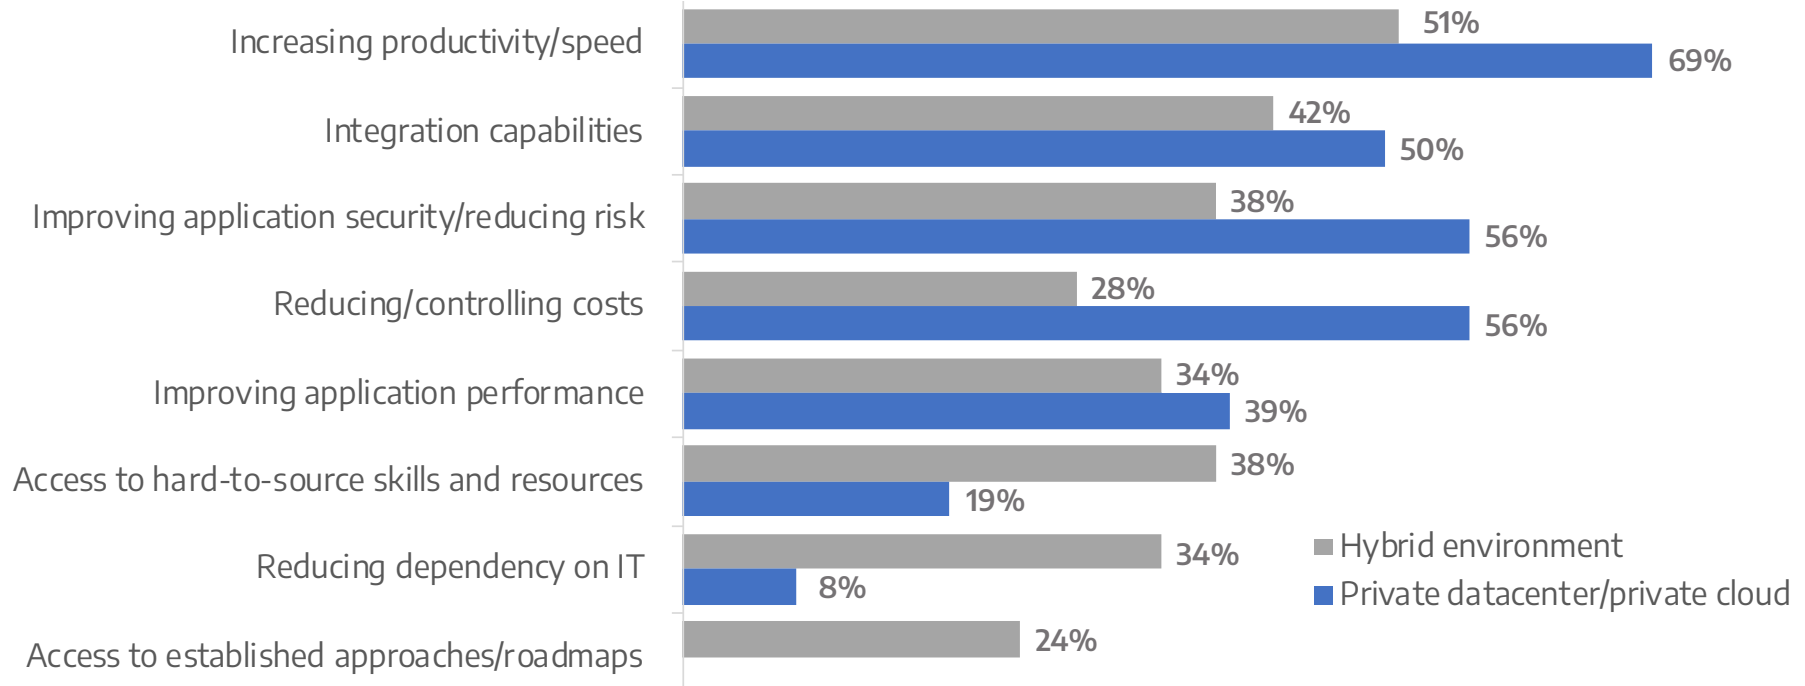

Question 8: From your perspective, what are the most attractive potential advantages of leveraging third-party services to help support your application environment? (Please select up to 3.)

Base 100

PERCEIVED ADVANTAGES OF THIRD-PARTY APPLICATION SUPPORT SERVICES VARY BY TYPE OF APPLICATION ENVIRONMENT

Attractive potential advantages of leveraging third-party services to help support an application environment.

Question 8: From your perspective, what are the most attractive potential advantages of leveraging third-party services to help support your application environment? (Please select up to 3.)

Base 53 with a hybrid environment; 36 with a private data center
