

# BACKUP AS A SERVICE FOR MICROSOFT 365 POWERED BY VEEAM

Microsoft Partner | Azure Expert MSP

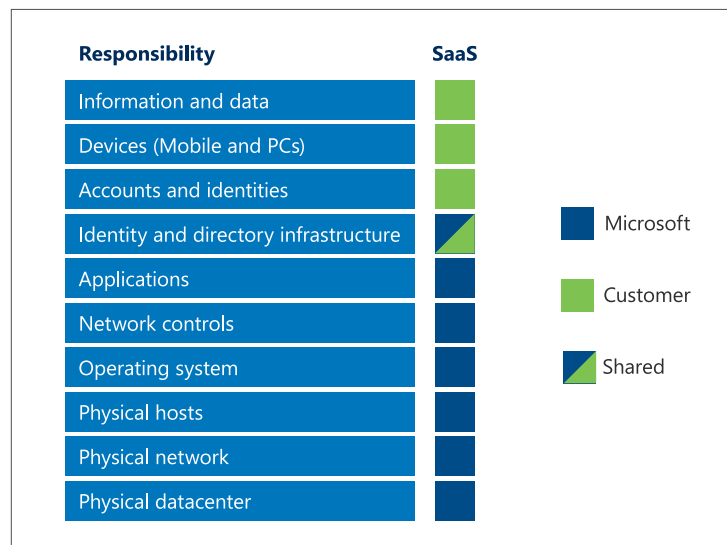

Organizations are enabling their workforce to work from anywhere at any time, through SaaS solutions like Microsoft 365. Every day people in your organizations are creating, sharing, and collaborating on massive amounts of data through Exchange Online, SharePoint Online, OneDrive for Business, and productivity apps like Microsoft Teams. Under Microsoft’s shared responsibility model, it’s on you to ensure your Microsoft 365 (SaaS) data is protected and backed up.

On average, downtime from data-loss events like ransomware costs small companies more than \$8,500 per hour, according to 2016 figures from Aberdeen Group.

Statistics show that 60% of data backups are incomplete and 50% of restores are unsuccessful.

QuikTeks, “Most Important Data Backup Stats,” 2020

A recent report by Verizon found that small instances of data loss cost businesses an average of \$18,120 to \$35,730.

## Why Do You Need a Backup and Replication Strategy?

- Accidental deletion
- Secondary locations for data copies
- Retention policies
- Internal and external security threats
- Legal and compliance requirements
- Managing hybrid deployments and migration

## Connection’s Backup as a Service for Microsoft 365, Powered By Veeam

Connection’s Managed Services can help you fill the gap between managing short- and long-term retention of Microsoft 365 data. BaaS can be added on to an existing Microsoft 365 Managed Service or can be purchased separately, including:

- **Scope:** Extended backup of Exchange mailboxes (current and archive), Teams, SharePoint, and OneDrive
- **Retention Period:** Unlimited
- **Backup Size:** 10GB/per user
- **Setup:** Complimentary backup configuration
- **Support:** 24x7 help desk with 2-hour response for file recovery
