Microsoft Modern Work and Security Services

Manage and Secure Employee IDs in the Cloud to Maintain Compliance

With Microsoft's Modern Work and Security Services, including Microsoft 365, Enterprise Mobility + Security Services, and Windows 10, you can empower today's workforce with secure enterprise productivity solutions.

Identity and Access Management

In today's from-home and remote environments, it's important for you to be able to grant seamless access to the services and software employees need to do their job. Identity and access management is the core foundation for successful deployment of on-premises, cloud, and hybrid workloads, and is what empowers employees to work securely and productively.

Microsoft Azure Active Directory (AD) serves as a universal platform to manage and secure identities surrounding Microsoft cloud services, such as Microsoft 365, Azure, and third-party SaaS and on-premises applications.

Our Services

- Azure AD design and integration for Microsoft Cloud Services, third-party SaaS applications, and on-premises applications

- On-premises Active Directory Health Assessments

- Single Sign-On (SSO) for access to applications from anywhere

- Conditional access and Multi-Factor Authentication (MFA) to help protect and govern access

- External identities to provide access for partners, customers, or any other user outside your organization

Cloud Productivity Services

Microsoft 365 is the productivity cloud that brings together best-in-class Office apps with powerful cloud services, device management, and advanced security for businesses and enterprises.

Our Services

- Design and deployment for Exchange Online and Hybrid Exchange

- Modern desktop POC and deployment with Windows 10

- Design and deployment for SharePoint Online and Hybrid SharePoint

- Office apps deployment

- Design and deployment for Microsoft Yammer

- Data migration services to OneDrive for Business, SharePoint Online, and more

Modern Teamwork Services

Microsoft Teams is the hub for teamwork. It is where employees can actively connect and collaborate in real time to get things done. Have a conversation right where the work is happening, whether co-authoring a document, having a meeting, or working together in other apps and services. Teams is the place to have informal chats, iterate quickly on a project, work with team files, and collaborate on shared deliverables.

Our Services

- Microsoft Teams Rapid Readiness Assessment for Design

- Microsoft Teams Deployment and Design Integration with SharePoint Online, Groups, and more

- Microsoft Teams for Meetings
  - Audio Conferencing Services
  - Microsoft Teams Rooms (MTR)

- Microsoft Teams Enterprise Voice Deployment
  - Microsoft Calling Plans and DID Porting

- Skype for Business Migrations to Microsoft Teams

- Microsoft Teams Governance

- Microsoft Teams Security and Compliance

Advanced Security Services

Microsoft 365 offers a core set of advanced security services specifically within the E5 Suite of products that allows your organization to prioritize security without sacrificing productivity.

Our Services

- Microsoft 365 Security Assessment

- Design and Deployment for Microsoft Secure Score

- Design and Deployment for Microsoft 365 Security Center

- Design and Deployment for Microsoft Cloud App Security

- Design and Deployment for Microsoft Information Protection

- Design and Deployment for Microsoft Threat Protection

- Design and Deployment for Microsoft Endpoint Management for Devices and Applications (Intune Included)

- Design and Deployment for Data Loss Prevention

- Design and Deployment for Azure Sentinel
