Networking Cables EIA/TIA 568C compliant

Take control of your data center or telecom room with space-saving, clutter-reducing CAT6 Ethernet cables with a slim and snagless design. A thinner cable is easier to install and increases airflow through your system. These high-quality patch cables ensure a solid networking connection, and the 50-micron gold-plated connectors resist corrosion and wear to keep working for a long time.

Our cables meet CAT6 Ethernet network cable standards and can support speeds of up to 1 gigabit per second.

belkin.

Sustainability.

Belkin creates products that make people's lives easier, better and more fulfilling through the power of technology. Our dedication to people-inspired design and quality informs everything we do, from our user testing and prototyping process to regulatory compliance, manufacturing and warranty programs.

Beyond achieving business success through the sales of our products in the global marketplace, our foundational focus remains steadfast on R&D, community, education and sustainability. We believe in leaving the world a better place and remain forever inspired by people and the planet on which we live.

2022 Award winner from Business Intelligence Group.

We are committed to environmentally ethical business practices on a global scale and we're proud to announce we're a winner of a 2022 Sustainability award! As a global leader in consumer electronics, this award signals progress for our company to lead positive change for our planet.

Same quality, same design, better for the planet.

Look for the Made with Recycled Plastics and Plastic-Free Packaging icons to find our products that are built from post-consumer recycled materials. You'll get the same quality, innovative designs at the same price while helping reduce dependence on first-production virgin plastics.

20% Single-use plastic reduction since 2019.

We successfully removed plastic in packaging and replaced it with recyclable materials. This was implemented across new and existing products. We use 100% Recycled PET (RPET) where possible, exceeding our goal to incorporate at least 30% RPET in our packaging when plastics are used.

Commitment to responsible packaging.

We require a chain-of-custody certification to ensure that our paper is sourced from responsibly managed forests and is compliant with all applicable local and international laws. This also ensures protection of worker and indigenous peoples' rights, minimizes our environmental impact, and protects the long-term viability of the forest.
